EDUCATION

University of Texas at Austin

Austin, TX

BS in Computer Science, Turing Scholars Honors Program & BS in Mathematics

May 2028

GPA: 3.96/4.0

Honors Coursework: Machine Learning, Operating Systems, Computer Architecture, Data Structures, Algorithms, Discrete Math

EXPERIENCE

Software Development Engineer Intern

Sep 2026 – Dec 2026

Amazon Web Services, Annapurna Labs

Austin, TX

- Incoming Fall 2026 on Graviton Team

Software Engineer Intern

May 2026 – Aug 2026

Doordash

San Francisco, CA

- Incoming Summer 2026 on Merchant Services Team

Undergraduate Research Assistant

Apr 2025 – Jan 2026

UT Data Systems Lab

Austin, TX

- Designed & optimized range-filtered ANN search algorithms with graph-based indexing and subgraph composition
- Benchmarked new search configurations that improved runtime memory consumption by 40% while sustaining near-baseline throughput and recall
- Evaluated performance bottlenecks and cache behavior on standard benchmarks using KCachegrind

TECHNICAL SKILLS

Languages: Java, Python, C/C++, Go, JavaScript, TypeScript, SQL/SQLite, x86-64, AArch64

Tools: Git, React, Flask, Django, MongoDB, Next.js, Catch2, JUnit, Valgrind, Numpy, Matplotlib, Scikit-learn

PROJECTS

SkinSage | *Python, SQLite, Selenium, NumPy, Matplotlib, Flask*

June 2024

- Mapped 2000+ cosmetic listings webscraped from OliveYoung based on chemical similarities to develop content-based recommender system
- Modeled ingredient lists using word embedding and one-hot encoding to visualize products as 2D vectors using t-SNE dimensional reduction
- Built full-stack web application displaying all product information and computing real-time cosmetic recommendations with cosine similarity

Gameboy Emulator | *C++, OpenGL, SDL*

Apr 2025

- Implemented fully functional emulator of the Gameboy Original, including CPU with ISA of 500+ instructions, liquid crystal display, pixel processing unit, and memory management unit
- Displayed cycle-accurate graphical output and supported joypad interrupts using OpenGL and SDL libraries

Tsoogle | *Java, Attoparser*

Nov 2024

- Indexed content of over 10,000 web pages using a web crawler extended from attoparser
- Designed full-stack web server displaying relevant page results by tokenizing and converting client-side queries supporting advanced search syntax to parse trees
- Verified reliability by implementing JUnit unit testing on randomly generated local web directories

INVOLVEMENT

Awards: JPMorganChase Code for Good Hackathon 2025 Winner, Groce Turing Scholarship in Computer Science

Undergraduate Teaching Assistant: CS109 Fall 2025

Organizations: Distributed Systems Reading Group, Turing Scholars Student Association, Women in Computer Science

Programs: Jane Street Insight (2026), SIG Discovery Day (2025)
